

ACCESSORIES AND SPARE PARTS

USEFUL INFORMATION

SPARE PARTS CENTRE - HONDA EUROPE

Our Spare Parts Call Centre handles all calls relating to:

- Spare parts related complaints
- Delivery times
- Backorder related reminders
- Search of parts on GIT2

THE GENUINE HONDA PART - HONDA EUROPE LOGISTICS, GHENT

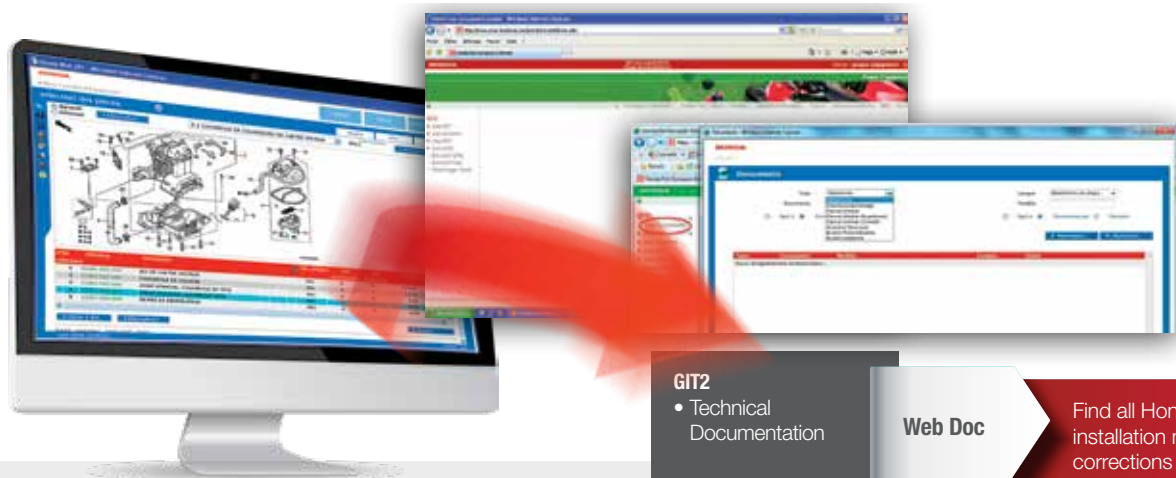

Honda recommends the exclusive use of Honda Original Spare Parts and Accessories.

Meeting very strict requirements, they **guarantee Honda quality** for you and **maximum comfort and safety in use** for our customers.

Our commitment is to offer and supply you with a complete range of **top quality** spare parts, accessories, lubricants and **reliable maintenance solutions** to ensure the longevity of our products.

GIT2, YOUR DIGITAL TOOL!

Use Global Infotech 2 to find, in record time, references, exploded views, photographs and applications of our spare parts and accessories, and directly place your spare parts order.

Available on the Internet via your Honda Extranet

[HTTPS://WWW.ECOM.HONDA-EU.COM](https://www.ecom.honda-eu.com)

GIT2

- Technical Documentation

Web Doc

Find all Honda technical documents, workshop manuals, installation manuals, technical documentation updates and corrections

- User Manuals

User Manuals

Find user manuals in PDF format to print them out for your customers

- Web PIT

Web PIT

Tool to identify certain categories of parts by their dimensions and visuals if you do not have the product serial number (belt, blade, etc.)

- Web Bulletins

Web Bulletins

All technical data sheets distributed by Honda for its equipment product range

- Web EPC

Web EPC

The spare parts search catalogue for all products and all categories of parts

- Web QRG

Web QRG

Catalogue to rapidly locate fast-moving parts by model

THE GENUINE HONDA PART OF SUPERIOR QUALITY AT THE RIGHT PRICE!

As part of the continual improvement of our service offer, Honda Europe has launched the MSPP "**Market Sensitive Parts Pricing**" programme, whose main aim is to allow you to buy and sell more Honda original parts by revising all our spare parts prices over time.

A customer-oriented price

A fair, market-oriented price

**WE STRIVE FOR CUSTOMER SATISFACTION BY SETTING THE RIGHT PRICE FOR EACH OF OUR SPARE PARTS.
TO THIS END, WE HAVE APPLIED A SPECIFIC METHODOLOGY:**

1 ANALYSIS OF TECHNICAL CHARACTERISTICS

- Dimensions, weight, specific technical characteristics

2 PRICE SIMPLIFICATION

- Group similar parts in order to create a reference price structure

3 COMPETITIVE POSITIONING

- Gather information on the competition for the purpose of repositioning
- Understand our competitive environment to optimise our offering

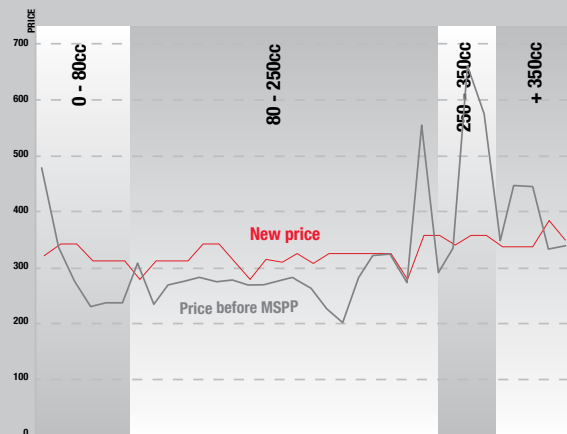

4 SALES OPTIMISATION

- Monitor results and revenues generated by the pricing methodology

EXAMPLE 1

Price evolution of carburettors

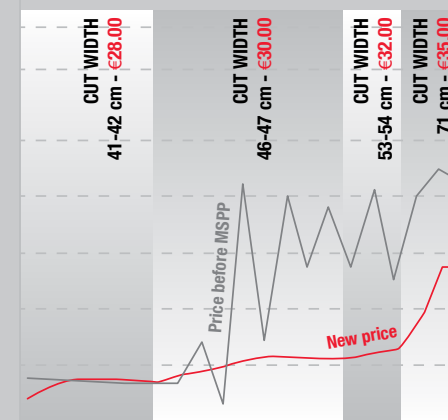

According to the cylinder capacity

EXAMPLE 2

Price evolution of blades

According to the cut width

MAINTAINING YOUR HONDA PRODUCTS PROPERLY

To back up our recommendations, Honda provides you with tools to protect your fuel:

Choosing your fuel

PUMP FUELS

Our motorised products can be used with the following fuels: **SP95, SP98, SP95-E10.**

You may be required to propose alkylate fuels. Honda does not offer this type of fuel, but does not recommend against its use.

DO NOT FORGET TO ADD FUEL STABILISER

FUEL STABILISER

to improve the storage life of your fuel.

ENGINES < 1990

all engines designed before 1990 require the addition of a "lead substitute" additive.

Maintaining your machine

DURING USE

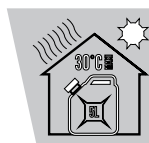

Consume fuel stored for less than 1 month or fuel treated with Honda stabiliser.

AT THE END OF THE SEASON

Drain the fuel tank if the machine will not be used for more than one month and follow the maintenance/storage tips given in the user manual.

DURING WINTER

Remember that proper maintenance in the winter is important for proper restarting in the spring!

Storing your fuel

- Store for a short period (max. 1 month).
- Store in small quantities (max. 5L).
- Use a leakproof container suitable for hydrocarbons.
- Store in a cool, ventilated place away from sunlight.
- Use a stabiliser to extend storage life.

DO NOT FORGET THE HONDA TOOLS PROVIDED FOR STORING YOUR FUEL!

PEDESTRIAN MOWERS MULCHING

• **Mulching***

For good mulching, mowing must be done on short grass, at regular intervals, to reduce the height of the grass being cut. Under the action of the twin blades and the cutter housing, the grass is recycled inside the cutter housing and reduced to finely chopped strands, spread evenly over the lawn.

• **Advantages of mulching:**

Save time You no longer need to remove the cut grass: there is no more need to empty the mower bag, which amounts to half the time spent mowing.

A healthy lawn Mulch provides natural nutrients to the lawn as it breaks up and prevents it from drying out during the summer.

No grass clippings You no longer need to go to your local waste disposal site.

* Finely crushed grass.

(Subject to stock availability)

This sign tells you to be careful during certain operations, notably concerning the blade tightening torque. Refer to the safety instructions in the machine user manual.

PEDESTRIAN MOWERS ENGINE PARTS

Why use Honda original spark plugs?

The spark plug is a technological element, developed specifically for each engine.

The heat that is generated varies from one engine model to the next, and depending on the application on which it is installed.

That is why the choice of spark plug is very important in ensuring that the cylinder head receives the appropriate energy ratio and the optimal temperature is maintained.

The heat value of the spark plug is crucial to ensuring optimal engine combustion (better performance and fewer pollutant emissions).

PEDESTRIAN MOWERS

CHASSIS PARTS

- The Honda RotoStop® kits, **complete and hard-wearing**, prolong the life of your machine (delivered with cable, belt, pulley and bolts).

This sign tells you to be careful during certain operations, notably concerning the blade tightening torque. Refer to the safety instructions in the machine user manual.

PEDESTRIAN MOWERS CHASSIS PARTS

*Make sure you have the right spacer for fixing the C3. If not, order spacer: 72617-VH3-N10.

This sign tells you to be careful during certain operations, notably concerning the blade tightening torque. Refer to the safety instructions in the machine user manual.

Multipack available, see p. 8.

ACCESSORIES

The protective cover developed by Honda protects your equipment once the work is done.

• **INDISPENSABLE!**

The Honda ride-on mower lifting jack allows full maintenance and cleaning of the machine in complete safety with just a few turns of the handle!

The OPTIMATE 12V automatic battery charger

charges, recovers and maintains all lead acid batteries with capacities from 2.5 Ah to 32 Ah. It is used for (normal, GEL, MF) lead acid batteries of ride-on mowers, generators and snowblowers

Delivered with alligator clips and charge adapter to be attached to the battery.

• **PRACTICAL!**

Mower deck scraper

The GOKO mower deck scraper is the ideal accessory for cleaning lawn mowers.

- The Honda hour meter keeps track of your product's service life!

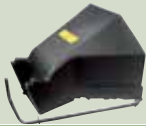

16,000 rpm max.

MULCHING

This kit offers several advantages:

Save time You no longer need to remove the cut grass: there is no more need to empty the mower bag, which amounts to half the time spent mowing.

A healthy lawn Mulch provides natural nutrients to the lawn as it breaks up and prevents it from drying out during the summer.

No grass clippings You no longer need to go to your local waste disposal site.

This sign tells you to be careful during certain operations, notably concerning the blade tightening torque. Refer to the safety instructions in the machine user manual.

NOTES

This image shows a full-page template for writing. It features a light gray background with horizontal dashed lines for text. A prominent green diagonal stripe runs from the top-left corner towards the bottom-right. On the left side, partially obscured by the green stripe, is a small photograph of a person wearing a dark shirt and pants, riding a red motorcycle. The rest of the page is a large, open area for handwriting practice.

BRUSHCUTTERS AND OTHER HANDHELD EQUIPMENT

OUR NYLON WIRE RANGE

Our high-quality wire ranges for all Honda brushcutters:

- **The SILENT Twisted Wire Line**

The SL range: Due to its spiral shape, the SL twisted wire line works silently: noise and vibrations are reduced. Its structure allows not only better air penetration but also better cutting efficiency.

- **The HIGH STRENGTH Angular Wire Line**

The WX range: With 10 outside edges and 5 inside edges, the WX angular nylon line has a unique structure designed to increase cutting efficiency and giving it superior strength.

- **The ROUNDWIRE Line**

The RL range: The original nylon line is an economical solution for unbeatable cutting comfort.

BRUSHCUTTERS AND OTHER HANDHELD EQUIPMENT

OUR NYLON WIRE RANGE

HONDA Round STYLE GRASS CUTTING LINE

Increased cutting efficiency using Honda Round monofilament

Honda ROUND monofilament is manufactured from a highly durable grade resin material, using a formula of three polymers formulated to produce profiles with superior characteristics in terms of abrasion, wear resistance, flexibility and weld resistance.

The round style grass cutting line from Honda is great for all year-round grass trimming.

HONDA WX STYLE GRASS CUTTING LINE

Increased cutting efficiency using Honda WX monofilament

Honda WX monofilament is manufactured from a highly durable grade resin material, using a formula of three polymers formulated to produce profiles with superior characteristics in terms of abrasion, wear resistance, flexibility and weld resistance.

The WX style grass cutting line from Honda has a unique profile designed for increased grass cutting efficiency.

- Due to the increased number of cutting edges, the WX profile continues to cut the grass even when the outer edges have worn.
- The WX line has 10 cutting points offering an increased cutting efficiency, 5 large and 5 small.
- As the large edges wear, the small edges pick up for continuous cutting.

HONDA SL STYLE GRASS CUTTING LINE

The environmental benefits of using Honda SL monofilament

Honda SL monofilament is manufactured using a formula of three polymers formulated to produce profiles with superior characteristics in terms of abrasion, wear resistance, flexibility and weld resistance.

- Low noise (reduces high frequency noise)
- Creates lower vibration than other line profiles.
- The spiral effect (twisted line) greatly improves the coefficient of penetration of the cutting filament through the air.
- Increased inertia (speed of head) which improves cutting ability.
- Improves engine efficiency (fuel and emissions) and motor (amps).
- Increases battery life.

BRUSHCUTTERS AND OTHER HANDHELD EQUIPMENT CUTTING TOOLS

Discover our pruner head which transforms your brushcutter into a real pruner capable of cutting branches from the soil.

The varied range of accessories for Honda brushcutters make them a complete and indispensable tool for all garden work.

The pruner head for Honda brushcutters: an ideal alternative for cutting branches at height in perfect comfort.

Every tool has its own use:

- **3-tooth blade:**
ideal for cutting spiny edges and thick scrub.
- **4-tooth blade:**
recommended for mowing large grassy areas.
- **80-tooth blade:**
suitable for mowing high, dry grass (e.g. reeds).

This sign tells you to be careful during certain operations, notably concerning the blade tightening torque. Refer to the safety instructions in the machine user manual.

TILLERS

ACCESSORIES

The tiller accessories presented in this catalogue have been approved in accordance with Machinery Directive EN709. The installation of any other equipment on a Honda tiller makes you responsible as manufacturer of the equipment and its accessory.

Honda tillers are versatile and their complementary accessories allow them to be used throughout the year. So, a single model can drive a rotary cutter, a border edger, an aerator, a de-thatcher, or a shredder tool.

- **The standard rotary tool** (cutter kit) gives the soil a suitable consistency for plant growth. The number of blades varies according to the work and the power of the machine.
- **The shredder kit** prepares and refines the soil by breaking up the clumps of earth.
- **The ridger** is a plough fitted with two ears that can be adjusted depending on the amount of space between the rows of plants. Passing between these rows, the ridger makes a furrow and deposits the soil at the foot of the plants on each side.
- **An adjustable transport wheel** can be fitted to the front of the tiller to facilitate transport and increase manoeuvrability.

• **The complete Kit:** This versatile kit combines three indispensable accessories to aerate the soil, eliminate moss and manage the ground.

- 1 **De-thatcher:** An abundance of moss can smother your lawn and tends to turn it yellow. The de-thatcher rakes and clears your lawn without damaging it.
- 2 **Aerator:** Aerating the soil allows healthy growth of the lawn. The whole area must be worked twice at right angles.
- 3 **Border edger:** This tool is useful for cutting borders and allows portions of turf to be cut and collected for new arrangements.

TILLERS

STANDARD AND SPECIAL ROTARY TOOLS

Honda tillers are versatile and their complementary accessories allow them to be used throughout the year.

The front and rear mounting devices can be used on all types of equipment.

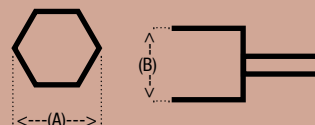

• The standard rotary tool:

This versatile tool is the basic tool for the tiller. When used in combination with the drawbar at the rear of the tiller, it can be used to dig, till, cultivate, weed, fertilise and refine the soil. Depending on the desired working width and the type of engine, 4 to 8 tines of 4 blades each can be fitted.

A plant protection disc can be fitted at each end and can be removed for deep tilling.

• Rotary ploughing and farming tools:

The rotary farming tool uses specially curved blades to cut up the roots. There are 6 of these blades on a standard tine or 8 on double tines. The tool is equipped with plant protection discs, which also limit the working depth and can be removed for deep tilling.

TILLERS

REAR CUTTER

- **The rear cutter** is a rotary tool linked to the tiller equipped with wheels (identical for ploughing). Its high rotating speed allows very finely worked soil to be achieved.

GENERATOR SETS

ACCESSORIES

• **Connection cables for parallel operation** are available for the EU generator sets.

A coupling cable connects 2 identical generators, doubling the power output.

NEW

Discover our new coupling box for EU70is.

The only generator on the market that provides an output of 14 kW!

It combines high output with minimal footprint.

NEW

1

2

NEW

Discover our new metal tank protector, ideal for charging the EU70is without damaging it!

Connection cables for parallel operation

	Reference	Description
EU10i	32360-ZC3-000	Allows connection of 2 EU10i: Rated output in parallel operation: 1.8 kVA Max. output in parallel operation: 2.0 kVA
EU20i EU22i	32360-Z07-C61 Up to Serial No 1725107 32360-Z07-C63 From Serial No 1725108	Allows connection of 2 EU20i: Rated output in parallel operation: 3.2 kVA Max. output in parallel operation: 4.0 kVA
EU20iK1	32360-Z07-C63	Allows connection of 2 EU20iK1: Rated output in parallel operation: 3.2 kVA Max. output in parallel operation: 4.0 kVA
EUT1	32360-Z07-C63	Allows connection of 2 EUT1T1: Rated output in parallel operation: 3.2 kVA Max. output in parallel operation: 4.0 kVA
EU26i	32360-Z28-C61	Allows connection of 2 EU26i: Rated output in parallel operation: 4.8 kVA Max. output in parallel operation: 5.2 kVA
EU30i		Allows connection of 2 EU30i: Rated output in parallel operation: 5.6 kVA Max. output in parallel operation: 6.0 kVA
EU30is	32360-ZS9-A62	Allows connection of 2 EU30is: Rated output in parallel operation: 5.6 kVA Max. output in parallel operation: 6.0 kVA
EU30is	32360-ZS9-A62	Allows connection of 2 EU30is: Rated output in parallel operation: 5.6 kVA Max. output in parallel operation: 6.0 kVA
EU70is	1 32360-Z37-003HE (box + 2 cables) 2 32380-Z37-003HE (cable only, 2 m.)	Allows connection of 2 EU70is: 32360-Z37-003HE: Rated output in parallel operation: 11 kVA Max. output in parallel operation: 14 kVA

NOTES

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

GENERATOR SETS

TRANSPORT KITS

- Think about **transport kits** that allow Honda generators to be moved with minimum effort. They are particularly **useful on building sites**.
- The **lifting kit** facilitates lifting of the generator. The hook is also useful for **securing the generator so as to avoid theft**.

* For lead/acid batteries from 2 to 32 Ah

** For lead/acid batteries from 7 to 120 Ah

USE OUR HONDA DIAGNOSTIC TOOL, DR H! DETAILS AVAILABLE ON EXTRANET

* Compatible models: HSS1380i, HSS1332i, HSM1390iK1, HSM1590i, HSM1390i, HSM1380i, HSM1336i, HSM1180i, HSL2511.

SNOW BLOWERS

CHASSIS PARTS

INDISPENSABLE!

- **Honda rubber tracks** for snow blowers. They protect your sensitive soil while allowing the scraper blade to be adjusted in relation to the nature of the soil.

POWER CARRIERS

ENGINE PARTS

The Honda rubber tracks are strong and give the power carrier a strong grip on all terrains (sand, mud, snow), even on steep slopes (up to 25° climbing and up to 15° descending). The tracks are also ecological because they limit damage to soil in mushroom farms, around vines, or on mountains.

TOOLS

- **The Honda ultrasonic cleaning tank** allows you to clean all your spare parts, including the most complex ones (carburettors, technical parts, etc.). Using an ultrasonic cleaning technique, it does not damage your parts and the operation can be repeated as many times as necessary.
- **The OPTIMATE 12V battery charger** automatically charges, recovers and maintains all lead acid batteries from 2.5 Ah to 32 Ah. It is used for lead acid batteries (standard, GEL, MF) of ride-on mowers, generators and snowblowers. Delivered with alligator clips and charge adapter to be attached to the battery.

Slow evaporating cleaner and degreaser, formulated to provide the ultimate cleaning performance and is recommended for cleaning of heavy contaminated vehicle engine exteriors and engine components

	Tools		
	Description	Reference	Information
	3 The OPTIMATE 12V automatic battery charger	08M51-EWA-600U - UK market only 08M51-EWA-601E - All other markets	Used for lead acid batteries of ride-on mowers, snowblowers and generators. Matching wall support: 08M51-OMB-RACKET
	4 Generator hour meter	08174-ZL8-023HE	All models
	5 AVR control	07KPJ-0010001	To be ordered with cables matching the generator

(Subject to stock availability)

NOTES

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins or other markings on the paper.

A collage of eight images showing various Honda outdoor power equipment in use. The images include: a green water slide in a lake; a man riding a red Honda riding mower; a close-up of a Honda engine; a person using a red Honda leaf blower; a red Honda lawnmower; a woman riding a red Honda riding mower; and a black and white inflatable ring on a lawn.
